

Telemarketer Block

Saved From: <https://voipo.com/help/article/telemarketer-block-70.html>

Telemarketers are getting more and more crafty these days. We have integrated a telemarketer block system driven on community based submissions.

If you enable this feature, any calls flagged by you or other VOIPo users as telemarketing will automatically go straight to your VOIPo voicemail.

To enable/disable the Telemarketer Block feature please follow the instructions below:

1. Log in to your VOIPo vPanel Account Management Tool account.voipo.com
2. Click the "Features" tab
3. In the "Telemarketer Block" Field select the drop down menu and select "Enable" or "Disable"
4. Once selected click "Update"

Do note that a number added to the list is not immediately blocked until confirmed by enough subscribers. Be sure to also Black List the phone number to immediately block calling on your account. See: [Call Blocking](#)
