Yes, you can have voicemail files emailed to you if a caller leaves a message. To enable this, do the following:

- 1) Log in to your VPanel at account.voipo.com
- 2) Select the "Voicemail" option located in the top right.
- 3) Input your email address in the field labeled "Send E-Mail Notification To:"
- 4) Select "Yes" in the drop-down menu labeled "Attach Message File"
- 5) Click the "Save Changes" button.

Now when a caller leaves a message, you will receive an email with an audio file of the voicemail message.
