

What type of internet service do I need for VOIPo?

Saved From: <https://voipo.com/help/article/what-type-of-internet-service-do-i-need-for-voipo-90.html>

VOIPo requires a high speed internet connection such as DSL, cable internet, or fiber optic service (such as FiOS).

It also requires a minimum of 256 kilobits per second or higher, upload and download speeds, for a quality connection.
