

What is a Virtual Number?

Saved From: <https://voipo.com/help/article/what-is-a-virtual-number-97.html>

You're able to add additional phone numbers to your account from any cities/rate centers that VOIPo offers service in. These numbers simply point to your primary number established with VOIPo. This is especially useful if you want to have a presence in another city.

An example would be if you lived in Houston and wanted a Miami phone number. Miami locals, or anyone, could call this Virtual Number at a local rate rather than paying long distance rates.

Virtual Numbers can be added for \$4.95 a month or \$36.00 annually.
